super cube®

COMPANY PROFILE · 2026

Leadership is learnable— and we prove it.

Human-centric leadership, developed from the core outward. The Super-Cube® model, the research behind it, and everything we offer for individuals, schools and organisations.

Choices · Principles · Mental · Emotional · Physical · Spiritual

Big Five Learn · the Educate pillar of Big Five Group™ · www.super-cube.me

WHO WE ARE

Big Five Learn: leadership development, built on Super-Cube®.

Big Five Learn is the Educate pillar of Big Five Group™. It focuses on leadership development using the Super-Cube® model: a multidimensional framework, developed and tested in doctoral research, for developing leadership capacity at personal, organisational, and network levels.

Feed. Educate. Empower.

FEED

Big Five Foods

Innovative, accessible, nutritious FMCG solutions that strengthen food security continent-wide.

EDUCATE · BIG FIVE LEARN

Super-Cube®

A pioneering holistic leadership model across Choices · Principles · Mental · Emotional · Physical · Spiritual intelligence.

EMPOWER

SupplierAdvisor®

Strategic programmes that equip suppliers, entrepreneurs, and communities with tools, strategies, and networks for sustainable growth.

A simple loop: measure, practise, prove.

Super-Cube® looks at the whole leader, not one skill. It measures six faces—Choices, Principles, Mental, Emotional, Physical and Spiritual—then helps each person grow the ones that matter most for them.

1. **Measure.** A free 10-minute baseline gives a score for each of the six faces of leadership, so strengths and gaps are visible.
2. **Practise.** Short sessions for each age group, with a weekly practice plan that starts with the weakest faces.
3. **Prove.** Measure again. A before-and-after report shows what changed, and the certificate has a public verify ID.

+32.2%

OVERALL GROWTH ACROSS ALL SIX FACES

12-week accredited Super-Cube® leadership intervention with leaders at Imana Foods and Kerry Foods: average pre/post gain in % (Leadership Is Learnable, 2026, Chapter 18)

+45.1%

PRINCIPLES (HIGHEST)

Largest construct gain in %—integrity, context, and accountable practice

6

HUMAN-CENTRIC CONSTRUCTS

Choices · Principles · Mental · Emotional · Physical · Spiritual

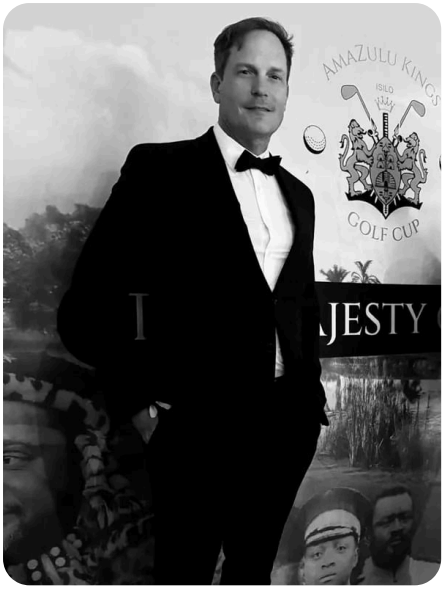

70–76%

LINKED TO EXPERIENCE AND LEARNING

Genes explain roughly 24–30% of who holds leadership roles; about 70–76% is linked to experience, environment and learning

+32.2% and +45.1% are average gains from the 12-week Super-Cube® leadership intervention with Imana Foods and Kerry Foods (see page 7), not from the doctoral study. They are not live programme data or a promised outcome.

FOUNDER

Dr Craig R. Muller

Visionary architect of Kingdom-centred leadership and sustainable impact in Africa

Dr Craig Ross Muller is the creator of the Super-Cube® leadership model and the founder and chief executive of the Big Five Group, based in Pietermaritzburg, KwaZulu-Natal, South Africa. The model grew out of his Doctor of Business Administration at the University of KwaZulu-Natal: a thesis on leadership skills development, completed in December 2020 and conferred in 2021, built as a case study of an African FMCG business network. He surveyed 132 people and interviewed ten directors to learn which leadership skills matter and how they can be developed, published the research in peer-reviewed journals in 2022, and has since seen the model taught in accredited programmes, including the 12-week intervention with leaders at Imana Foods and Kerry Foods.

He has spent more than twenty years in blue-chip FMCG, supply-chain optimisation and global consulting. He holds an MBA (2006, with a distinction for his dissertation on sub-Saharan vendor reliability) and a Postgraduate Diploma in Management (2004) from the University of KwaZulu-Natal, and a Bachelor of Commerce from the University of Natal (2002). His certifications include PMP, PRINCE2, Managing Successful Programmes and Lean Six Sigma Black Belt.

The Big Five Group's mission is three words: feed, educate, empower; Super-Cube® and Big Five Learn are how it educates. Craig's conviction, and the argument of his book Leadership Is Learnable, is that Africa's progress depends as much on the skills of its leaders as on its resources, and that those skills can be learnt by anyone, at any age.

Above all, Craig is the very proud father of Georgia and Benjamin, and hopes this work will inspire them, and their generation, to do good and help humanity move forward.

Integrity · **Excellence** · **Compassionate empowerment**

SPEAKING

Keynotes, workshops and panels: **Leadership is learnable: the six faces of the Super-Cube® · Measure growth, not attendance · Ubuntu and I–Thou: human-centric leadership · Leadership education as a development lever · Raising leaders early**. super-cube.me/speaking

THE MODEL

Six faces of leadership. One person at the centre.

The Super-Cube® Leadership Model is a multidimensional framework, developed and tested in doctoral research, for developing leadership capacity at personal, organisational, and network levels. Choices sit on top, Principles at the base, and Mental, Emotional, Physical and Spiritual form the sides—with the individual at the centre of the cube.

Choices
Decision-making intelligence under complexity

Spiritual
Purpose, meaning, and transcendent motivation

Mental
Cognitive power for strategy and vision

Physical
Energy and resilience for sustained leadership

Emotional
Intelligence that builds trust and inspires action

Principles
Ethical foundations that earn lasting trust

PHILOSOPHY

Sets values: Ubuntu, Buber's I–Thou and Wilber's integral AQAL hold the leader as a whole person, never an object of control.

THEORY

Explains how leadership works: from trait, behavioural and contingency schools to relational, shared and neuroscientific perspectives.

MODEL

Super-Cube® is the model learners can practise and assess—six developable faces, measured before and after.

Five levels of application: from self to systems

1

Individual

Personal development plans

Leaders engage in structured self-improvement with pre- and post-assessments across all six constructs. Deliberate practice begins with you at the centre of the cube.

2

Single Business

Leadership pipelines

Systematic talent development within one organisation—building consistent leadership capacity through construct-aligned interventions.

3

Business Group

Coordinated organisational scale

Coordinated leadership enhancement across a multi-entity group, aligning language, standards, and development pathways.

4

Supply Network

Alliance & value-chain capacity

Leadership development across interconnected entities—strengthening network-wide capacity and interdependencies in the value chain.

5

Industry

Sector-wide impact

A framework for broader adoption—addressing growth, skills gaps, and institutional complexity at industry scale.

THE SIX FACES

Each face is a developable domain.

Taught, practised, tracked and assessed. These are the skills the platform measures on every face (adult programme).

Choices

Decision-making intelligence under complexity

Select wise action amid ambiguity—balancing moral values, judgement, and calculated risk.

Decision-making intelligence · Moral values · Judgement · Risk-taking

Grounded in choice theory, addressing decision-making intelligence, moral judgment, and risk assessment as developable leadership capabilities.

Principles

Ethical foundations that earn lasting trust

Lead with integrity, contextual awareness, situational judgement, and accountable governance—lived through virtues from love and honesty to forgiveness and improvement.

Ethical foundations · Contextual awareness · Situational judgement · Governance

Draws on principle-centred leadership and Principle Theory (Caldwell, Karri & Vollmar), emphasising ethical duties to followers and fair, trust-building governance—expressed through developable character virtues that operationalise principled leadership in daily practice.

Mental

Cognitive power for strategy and vision

Think strategically, solve complex problems, set vision, and apply knowledge in context.

Cognitive intelligence · Strategic thinking · Problem-solving · Vision · Knowledge application

Supported by cognition theory and research on cognitive skills for creative problem-solving and strategic leadership (Prinsloo & Barrett; Mumford et al.).

Emotional

Intelligence that builds trust and inspires action

Perceive, understand, and manage emotions to strengthen relationships and collective performance.

Emotional intelligence · Empathy · Social relationships · Motivation · Inspiration

Anchored in the ability model of emotional intelligence (Mayer, Salovey & Caruso)—perceiving, facilitating, understanding, and managing emotions as trainable competencies.

Physical

Energy and resilience for sustained leadership

Protect health, manage energy, and build the bodily resilience leadership demands.

Physical health · Energy management · Fitness · Nutrition · Bodily resilience

Informed by the physical wellbeing dimension of the Wheel of Wellness and holistic models that treat physiological vitality as essential to long-term effectiveness.

Spiritual

Purpose, meaning, and transcendent motivation

Align leadership with purpose, meaning, faith, and spiritual intelligence.

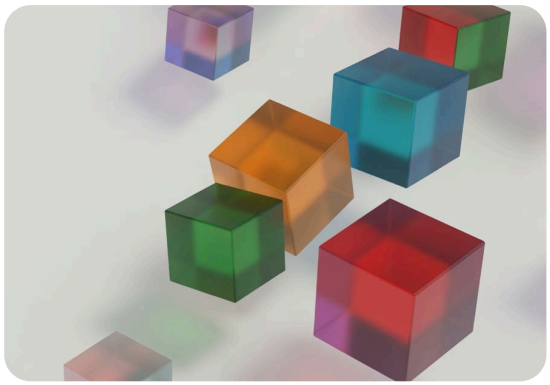

Purpose · Meaning · Faith · Transcendence · Spiritual intelligence

Informed by theories of spiritual intelligence and transcendence, connecting purpose and meaning to motivation, commitment, and integrated leadership practice.

FOUNDATIONS

Grounded in theory, from the major schools to Ubuntu.

The Super-Cube® literature map moves from classical trait, behavioural, and contingency theories, through relational, shared, biological/evolutionary, and neuroscientific perspectives, into contemporary topics (identity, culture, globalisation, entrepreneurial leadership), skills-development debates, and higher-order integral and philosophical frames (AQAL and I–Thou). It is also grounded in the African philosophical perspective of Ubuntu. Together these strands underpin the six-dimensional Super-Cube® model.

Historical and major schools

The established and evolving "major schools" of leadership research and practice—trait through neuroscience—often read as leadership past, present, and future.

Trait approach · Behavioural approach · Contingency / situational approaches · Charisma and new leadership · Follower-centric approaches · Relational approaches · Shared leadership · Biological and evolutionary schools · Neuroscience perspectives

Leadership: past, present and future

Complementary labels that sit alongside the major schools—context, relation, critique, cognition, and emerging agendas.

Contextual leadership · Relational leadership · Sceptics · Information-processing approaches · Emerging issues

Contemporary / current topics

Current topics that sit on top of the classical schools and shape how Super-Cube® is applied in complex, global, and entrepreneurial settings.

Socio-cognition and social perception · Gender · Power · Identity · Culture · Globalisation · Entrepreneurial leadership

Leadership skills development literature

The development literature that justifies deliberate practice, measurement, and progressive pathways in Super-Cube® Learn.

Nature versus nurture debate · Longitudinal perspectives · Knowledge, skills and abilities (KSAs) · Theory, research and practice of leadership development

Broader theoretical / philosophical perspectives

Integral and dialogical philosophies that hold the Super-Cube® as a human-centric system—with African Ubuntu as a foundational stance alongside Western integral and dialogical thought.

All Quadrant All Level (AQAL) · I–Thou theory (Martin Buber) · Ubuntu

> ## "I am because we are."
>
> **Ubuntu: African philosophy of personhood-in-relation—humanity, dignity, and shared becoming. A foundational stance of the Super-Cube® model.**

THE RESEARCH

Tested before it was taught.

Super-Cube® came out of Dr Craig Muller's doctoral research at the University of KwaZulu-Natal (thesis, 2020). The model was tested with a survey of 132 people and interviews with ten directors, published in peer-reviewed journals in 2022, and set out in full in the book *Leadership Is Learnable* (2026).

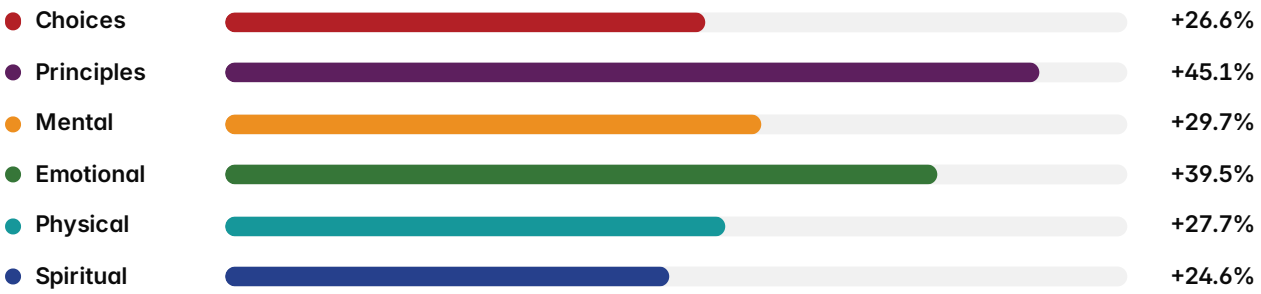

12-WEEK INTERVENTION RESULT · EMOTIONAL FACE

+39.5%

Overall, all six faces: **+32.2%**

AVERAGE PRE- TO POST-ASSESSMENT IMPROVEMENT, BY FACE

Intervention results: average pre- to post-assessment improvement in the 12-week, accredited Super-Cube® leadership intervention (NQF levels 3–5) with leaders at Imana Foods and Kerry Foods. The doctoral study built the model; it did not measure these gains. Highest gains: Principles (+45.1%) and Emotional (+39.5%). Not a promised outcome and not live programme data.

Mixed-methods design

Pragmatic explanatory sequential design: quantitative survey first, then qualitative interviews to explain and deepen the findings.

132 survey respondents

Online survey of employees in an African FMCG business network tested structural validity and reliability across the six constructs.

Acceptable model fit

Confirmatory factor analysis: CMIN/DF 2.232, CFI 0.86, RMSEA 0.097—collectively indicating acceptable structural fit.

Ten director interviews

Thematic analysis of interviews with ten directors supported all six constructs in lived leadership practice.

What is inside

· **Foreword**
Dr Housainou Taal, Director, African Leadership Institute

1 **The Leadership Imperative**
Why Africa holds the key to humanity's future

2 **The Genesis of the Super-Cube®**
From thesis to transformation

3 **Understanding the Cube**
The six dimensions of Super-Leadership

4 **Choices**
The courage to decide in the fog of uncertainty

5 **Principles**
The unshakeable compass

6 **Mental**
The strategic mind that sees around corners

7 **Emotional**
The heart that connects and inspires

8 **Physical**
The sustainable vessel for long-haul leadership

9 **Spiritual**
The purpose that transcends and sustains

10 **From Self to Society**
Scaling the Super-Cube® across levels

11 **Leaders for the Global Goals**
Why the world's to-do list needs leaders, and why we must build them

12 **The Big Five Way**
Real-world application across Africa

13 **Your Super-Cube® Action Plan**
Start today, lead tomorrow

· **Epilogue: A Super-Cube® World Awaits**
Leadership for the generations to come

· **Resources and Next Steps**
Further reading, research and where to go next

Read the book, then measure your own six faces with the free 10-minute baseline.

WHAT WE OFFER

One model for every stage of life.

The six faces stay the same as people grow. The language, examples and reporting change with who they are and where they lead.

INDIVIDUALS

Grow your own leadership

A free baseline, short courses for your age group and a before-and-after report. Kids 5–12 · Adolescents 13–21 · Adults 22+.

super-cube.me/what

SCHOOLS

A pathway for every learner

Age-appropriate leadership for learners aged 5 to 21, with progress views for teachers and consent built in.

super-cube.me/schools

ORGANISATIONS

Develop leaders across a team

Seat packs, cohort reporting and facilitated programmes for companies, NGOs and multi-entity networks.

super-cube.me/organisations

SPEAKING

Keynotes and workshops

Dr Craig Muller on learnable, human-centric leadership—keynote, workshop or panel, shaped to the audience.

super-cube.me/speaking

Everything you need to grow, and to show it.

- ✓ A free six-face leadership baseline
- ✓ Six short courses, written for your age group
- ✓ A weekly practice plan focused on your weakest faces
- ✓ A second assessment to measure the change
- ✓ A before-and-after growth report (PDF)
- ✓ A certificate with a public verify ID
- ✓ Private journals: a coach sees your scores only if you agree

FREE BASELINE

R0

Six-face scores in about 10 minutes. No card needed.

FULL PROGRAMME, PER PERSON

R99 once

About $6 USD. Courses, practice plan, second assessment, report and certificate. No subscription.

GROUPS, SCHOOLS, ORGANISATIONS

From R891

Seat packs for 10 learners, or a quote for a full programme with facilitation and reporting.

PROGRAMMES

Kids, Adolescents and Adults.

Every programme covers all six faces with a pre-assessment baseline, six construct courses (age-adapted), practice labs and checks, and a post-assessment with a personal report.

AGES 5–12

Super-Cube® Kids

Growing character, curiosity, and kindness.

A guided Super-Cube® journey for younger learners—simple language, stories, play-based practice, and parent/teacher support. Builds the six faces of leadership as everyday strengths.

Ideal for parents, schools, and after-school programmes.

SKILLS BY FACE

- **Choices** Making good decisions · Knowing right from wrong · Thinking before acting · Trying bravely
- **Principles** Being honest · Understanding others · Fair play · Keeping promises
- **Mental** Curious thinking · Solving puzzles · Big ideas · Learning new things
- **Emotional** Naming feelings · Kindness · Friends & family · Staying calm
- **Physical** Moving your body · Rest & energy · Healthy food · Feeling strong
- **Spiritual** What matters to me · Hope & wonder · Belonging · Helping others

R99 · lifetime access

AGES 13–21

Super-Cube® Adolescents

Identity, influence, and wise decisions.

For teens and young adults navigating school, sport, first jobs, and digital life. Develops choices, principles, mindset, emotions, body, and purpose—with real-world scenarios.

Ideal for high school, college, youth leadership, and first-time supervisors.

SKILLS BY FACE

- **Choices** Decision-making under pressure · Personal values · Judgement online & offline · Healthy risk-taking
- **Principles** Integrity & trust · Reading the room · Situational judgement · Accountability
- **Mental** Strategic thinking · Problem-solving · Vision for your future · Applying knowledge
- **Emotional** Emotional intelligence · Empathy · Relationships & peer influence · Motivation & confidence
- **Physical** Health & energy · Stress & recovery · Fitness habits · Resilience under load
- **Spiritual** Purpose & identity · Meaning · Beliefs & belonging · Transcendent goals

R99 · lifetime access

AGES 22+

Super-Cube® Adults

Human-centric leadership for work and life.

The full professional Super-Cube® pathway: pre-assessment, six construct courses, deliberate practice, post-assessment, and a personal development report for workplace leaders.

Ideal for professionals, managers, and high-potentials.

SKILLS BY FACE

- **Choices** Decision-making intelligence · Moral values · Judgement · Risk-taking
- **Principles** Ethical foundations · Contextual awareness · Situational judgement · Governance
- **Mental** Cognitive intelligence · Strategic thinking · Problem-solving · Vision · Knowledge application
- **Emotional** Emotional intelligence · Empathy · Social relationships · Motivation · Inspiration
- **Physical** Physical health · Energy management · Fitness · Nutrition · Bodily resilience
- **Spiritual** Purpose · Meaning · Faith · Transcendence · Spiritual intelligence

R99 · lifetime access

NOT SURE WHERE TO START?

Begin with the free six-face baseline (R0, about 10 minutes), then pick the programme for the learner's age. Schools and organisations can buy seat packs from R891 (pricing on page 14).

Not a lecture. A development system.

Learners understand, practise, track and prove growth—on any device. Five stages, one coherent journey.

01

Orient

Clarify whether the learner thinks from philosophy, theory, or model—so education meets them where they are.

02

Free baseline

Baseline all six faces in about 10 minutes. Strengths and priorities become visible, discussable, and improvable.

03

Learn the six faces

Structured sessions for each face—age-adapted language and scenarios.

04

Track & practise

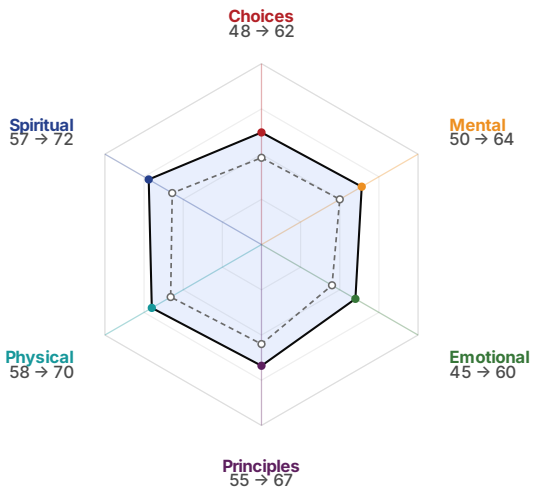

Daily or weekly face pulses reveal patterns. Weekly plans adapt to the weakest faces.

05

Re-measure & report

Post-assessment and a personal growth report, so growth is measured—not assumed.

GROWTH REPORT · BEFORE → AFTER

Before (dashed) After (filled)

Example only: the illustrative composite from the site's sample report (overall 52 → 68), not a real learner or a research result.

VERIFIABLE CERTIFICATE

Completion certificates carry an ID like **SC-YYYYMMDD-HEX**. Anyone can check it on the public verify page, super-cube.me/verify/<ID>.

PRIVATE BY DESIGN

Journals stay private. Coaches see scores and completion only when learners consent—never journal text. Learners can turn sharing off at any time.

CONTINUOUS FACE TRACKING

Beyond one-off assessments: daily or weekly face pulses show patterns between assessments, and micro-practices adapt to each learner's growth priorities.

CERTIFICATION LADDER

1 · Learner completes the pathway.
2 · Practitioner keeps a 30-day deliberate-practice streak.
3 · Facilitator runs a cohort with the 8-week calendar, roster and consented heat map.

BASELINE

28-question instrument

One consistent six-face questionnaire, scored on the server, for every programme.

MASTERY

Spaced review

Skill mastery tracking, with reviews at day 3, 7 and 21 and weakest faces first.

MOTIVATION

Streaks, levels, badges

Points, levels, a weekly goal, streak freezes and badges that reward practice, not speed.

ANY DEVICE

Install as an app

Works on phone, tablet and laptop, and installs to the home screen.

SCHOOLS AND ORGANISATIONS

Leadership growth you can show a principal or a board.

FOR SCHOOLS

Grow young leaders, and see the growth.

- **One model from Grade R to matric** and beyond, so the language of leadership stays consistent.
- **Kids and Adolescents pathways** with short sessions that fit between classes.
- **Cohort codes for teachers:** completion and growth snapshots; journals stay private.
- **Safe by design:** run under your safeguarding and parental-consent policies; no public score comparisons.

FOR ORGANISATIONS

Develop leaders you can measure.

- **Whole-leader development** across all six faces, online at each leader's pace.
- **Optional facilitated sessions** with the 8-week facilitator calendar and coach tools.
- **Cohort view, with consent:** completion and scores only where leaders agree.
- **Before-and-after report:** pre → post change by face for the cohort, plus individual reports.

Four steps, from baseline to proof

1

Pre-assessment

A 10-minute, age-appropriate baseline across the six faces.

2

Programme

Six short courses and a weekly practice plan, weakest faces first.

3

Post-assessment

Re-measure at the end of the term or programme.

4

Report

A cohort report of the change; each learner gets a growth report and certificate.

FIELD SNAPSHOT · SCHOOLS

0%
had a leadership model they actually used

88%
would like to develop their leadership using a scientific approach

94%
believe leadership is important

Survey of 33 Grade 12 boarders at a leading high school in South Africa (August 2024). Self-reported answers, not assessment scores or before-and-after results.

COACH AND COHORT DASHBOARDS

Cohort codes and roster · consented face heat map · before-and-after impact by face with 95% confidence intervals and effect sizes · CSV export and an ROI pack (PDF) · verify URLs for every certificate. Consented scores only—never journals.

PILOTS

An 8-week pilot, ready to run.

Everything a principal, L&D lead, or coach needs to run an 8-week Super-Cube® pilot—without inventing process from scratch. Pathway: orient → baseline → six faces → mid check-in → post → report & certificate.

WEEK 1
Orient & join
Safety, purpose, cohort code, orientation assessment

WEEK 2
Baseline
Full six-face pre-assessment

WEEK 3
Choices & Principles
Decision craft and ethical spine

WEEK 4
Mental & Emotional
Cognition and regulation under pressure

WEEK 5
Physical & Spiritual
Presence, energy, purpose

WEEK 6
Integration week
Catch-up, weakest-face deep practice

WEEK 7
Re-measure
Post-assessment + growth report

WEEK 8
Celebrate & certify
Certificates, verify IDs, next pathway

SAFEGUARDING

- No forced public sharing of personal scores or journal text.
- Facilitators never grade 'character'—only completion and growth effort.
- Parent and guardian communication emphasises development, not ranking.

PILOT TOOLKIT

- Org codes, roster, CSV export, face heat map and verify URLs.
- Facilitator kit with the 8-week rhythm and session notes.
- Draft consent language to adapt under your POPIA counsel.

super-cube.me/pilot-pack
super-cube.me/facilitator

20 seats	Department or grade cohort	**R1683**	**$102**
50 seats	School / company licence pack	**R3960**	**$240**

THE BOOK

Leadership Is Learnable · paperback R299 · Kindle R149

South African launch 31 October 2026. Buy on Amazon: paperback · Kindle e-book. Details on page 8.

Prices as listed on super-cube.me/pricing. For a grade, a whole school, facilitation or custom reporting, we'll send a quote. Payments are processed securely by Paystack.

The world has goals. It needs leaders who can deliver them.

Development gaps are leadership capacity gaps. Food systems, poverty, health, climate, and peace all stall when leaders cannot choose wisely, govern fairly, think in systems, mobilise people, sustain energy, and stay anchored in purpose. Super-Cube® develops whole-person leaders who can close delivery gaps—from the individual outward to organisations and networks.

The 2030 Agenda asks for leaders who can hold complexity (Choices), earn trust (Principles), think in systems (Mental), mobilise people (Emotional), sustain energy (Physical), and serve a purpose larger than themselves (Spiritual).

GOAL 4 · QUALITY EDUCATION

Mental leadership strengthens vision and knowledge application for curriculum and system reform. Emotional and Spiritual faces develop the relational trust and purpose that keep learners engaged. Choices and Principles support fair resource decisions and safeguarding cultures.

GOAL 8 · DECENT WORK

Super-Cube® develops workplace culture through Principles (integrity, fairness), Emotional (motivation, trust), Mental (strategy and problem-solving), and Choices (judgement under risk)—so growth does not come at the cost of people.

GOAL 16 · PEACE & JUSTICE

Principles is core: integrity, governance, and contextual ethics. Emotional intelligence de-escalates and repairs relationships. Choices and Spiritual faces support moral courage and purpose when power is contested. Mental capacity designs institutions that last.

IN THE BOOK · CHAPTER 11

Leaders for the Global Goals

Why the world's to-do list needs leaders, and why we must build them. *Leadership Is Learnable*: paperback R299, Kindle R149 (page 8).

Official UN SDG icons and titles · challenges framed for leadership development · Super-Cube® does not claim UN endorsement. Full goal-by-goal view: super-cube.me/leadership-challenges

Start with a free 10-minute baseline.
